EDUCATION

University of Pittsburgh – Main Campus *Grad: December 2028*
B.S. in Data Science, **Specialization in Computer Systems** Major GPA: **3.6**

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, R, SQL, Swift
Frameworks: React.js, Angular, Next.js, Node.js, Streamlit, FastAPI, Pandas, NumPy, SHAP, SwiftUI
Technologies: Docker, Azure, AWS, Hugging Face, REST APIs, Microsoft Fabric, Power BI, Git, GitHub
Relevant Coursework: Data Structures & Algorithms, Discrete Mathematics, Database Systems, Linear Algebra

EXPERIENCE

Quest Diagnostics | Fortune 500 Diagnostics (NYSE: DGX) *Pittsburgh, PA*
Enterprise Data Engineer *Aug 2026 – Present*

- Own 5 production data pipelines on Microsoft Fabric & Azure for clinical lab reporting across 100+ labs
- Build 10+ CTE-based dimensional SQL/PostgreSQL models that turn raw source data into analytics-tables
- Extend CI/CD ingestion processing 1000+ daily jobs behind cloud integration adopted across 16 lab sites

Data Analytics Intern *June 2026 – Aug 2026*

- Accelerated data integration speed by 25% by migrating legacy workflows into modernized Azure OneLake
- Built a scalable Tier 1 TAT database serving as the performance-metric source for 100+ regional laboratories
- Increased pipeline deployment efficiency by 30% by integrating automated CI/CD into production stacks

Mascaro Construction Company, LP *Pittsburgh, PA*
Data Analyst Intern *Mar 2025 – May 2025*

- Improved labor/quantity data accessibility by 45% by organizing real-time construction records
- Reduced manual Excel processing time by 40% by automating workflows with Python/Copilot
- Improved cost comparison accuracy by ~20–25% by analyzing labor and pricing data using R

LEADERSHIP

AWS Cloud Club *Pittsburgh, PA*
Technical Chair *Sep 2026 – Present*

- Lead hands-on technical workshops on AWS services, cloud architecture, and deployment for club members
- Organize cloud certification study groups and guided build projects to grow members' practical cloud skills

Phi Beta Lambda *Pittsburgh, PA*
Vice President of Finance *Apr 2026 – Present*

- Improved chapter engagement by leading 100+ members in competitions & event coordination
- Coordinated chapter budgeting and financial planning with executive leadership

PROJECTS

Bravox | *Next.js, FastAPI, PostgreSQL (Neon), Render – bravoxcredit.com*

- Built and shipped a full-stack credit-card pre-approval estimator evaluating 27 cards across 3 bureaus
- Deployed solo to production with secure auth (PBKDF2, login lockout), rate limiting, & CSP/HSTS headers

Sleep Insights Dashboard | *Python, Pandas, NumPy, scikit-learn, Streamlit, Joblib, SHAP*

- Built an end-to-end pipeline integrating Fitbit and Apple Health data w/ feature engineering and EDA
- Trained a Random Forest model achieving 93% accuracy on nightly sleep scores & SHAP explainability
- Deployed an interactive Streamlit dashboard to surface predictions and per-feature SHAP contributions

Personal YouTube Content Algorithm | *Python, FastAPI, PostgreSQL, Redis, Render, REST API, React*

- Modeled personal watch behavior by collecting and analyzing interaction data using YouTube Data API
- Ranked videos by relevance using content-based similarity and engagement-driven features
- Cached ranked results in Redis and served them through a FastAPI REST endpoint to a React front end

Keystroke | *Swift, SwiftUI, Python, FastAPI, REST API*

- Developed an iOS app using SwiftUI and FastAPI that turns user images into custom Apple Wallet passes
- Engineered backend to process image uploads, handling Apple Wallet's pass-signing requirements
